

Learning Recovery Opportunity for the Students of Pleasant Valley School District

The Pleasant Valley School District is pleased to offer a Learning Recovery Opportunity (LRO) to support students who are in jeopardy of not attaining academic proficiency during the quarterly reporting period. The LRO is being offered to **invited** K-12 Pleasant Valley School District students at no charge for up to two (2) subjects, but most specifically English Language Arts and Mathematics. LRO will be held on Tuesdays and Thursdays from November 8th to January 18th.

The LRO will be offered to students who have not achieved mastery (2 or lower on the report card in grade K-2, 60% or lower grades 3-12). Selection for the program will begin at the mid quarter point when progress reports are assigned. The program will run quarterly.

Students will have the opportunity to gain proficiency for the course/subject chosen (of the most recent quarter only) by completing this grade level, content specific, student centered, academic recovery opportunity.

The vision for this programming seeks to support student learning in the areas of English Language Arts (ELA) and Mathematics while supporting their social emotional well-being and physical health.

LRO is offered by invitation only. Further information will become available from your student's teacher.
