

Do you have awesome ideas about how adults can support young people as they prepare for success after high school?

Are you...

- A young person (ages 14 to 25)?
- A parent or guardian of a young person?
- Or an adult who supports young people (like an educator, employer or agency personnel) or a community member?

Join Our Transition Change Agent Team!

This past year, Pleasant Valley School District sent a survey out to young people, families and the adults who support them. This survey asked them to share their experiences with planning for success after high school (transition planning). The survey showed that there are some things that adults could do even better to support young people.

We need your ideas on our team! This team will lead the entire community in deciding what to do, how to do it and making the plan happen!
